Brief description of Project: The project will survey the Rio Hondo from Alhambra Wash to Peck Road Water Conservation Park in order to: evaluate the potential open space acquisitions; trail access improvements; propose projects that can improve habitat restoration, recreation potential, alternative transportation value, and user education. Working with County Staff, public agencies and community members, a master plan of potential improvements for Peck Park will be developed, including: habitat restoration; demonstrative garden of California native plants; irrigation improvements; educational displays; artistic metalwork gates; bike trail maps and signage; park entrance improvements; a bio-filtration system for storm water enhancement; trails linking communities to the San Gabriel River. The finished study will include a prioritized list of potential improvements and costs, renderings, maps and a published project report.		
I certify that the information contained in this Project Application form and Application requirements is accurate.
